- ✓ Designed & Manufactured in Australia

Another solution from

GLOBALTECH®

www.globaltechcorp.com

* Only caller ID phones will display caller ID information.

Great Savings

Now you can choose and pre-select the least costly telephone service provider for outgoing calls.

You can enable your single line telephones with all the features of an expensive system handset.

The **GLOBALTECH MaTriX** is a PBX-based phone system and is wired in a typical star configuration. This means that if you are looking to replace your old phone system, your installer can utilise most of your existing wiring, resulting in significant savings.*

*Subject to inspection of premises first.

Modularity means you pay now for what you need, and expand later.

Call barring per extension is also available to restrict un-authorized calling, saving you more money.

Great Benefits

Convenient

You can make or receive a call from any line and any extension; Hold it, Transfer it, patch it into a 3-way conference or simply Switch between two conversations, keeping each conversation private. Plus you can, of course, Intercom from any one extension to another and pick-up a call intended for another extension. You can also program Reminder calls, and activate the DND feature (Do-Not-Disturb) by the press of a button. Room Monitoring is also easily achievable, as are Paging features.

Practical

There are many handset models that will provide all the features and are able to operate hands-free with Speaker-phone and/or Headset. Even Cordless phones can be enabled to become fully featured.

Easy

Normal operation is as simple as using a normal phone. If the phone is ringing pick-up the handset to answer. If you want to initiate a call pick-up the handset and dial an extension number for an intercom call or dial '0' to get an outside line and then dial the number.

Efficient

If busy, a 'call back when free' feature is available for intercom and outside calls. This saves time and prevents you from forgetting to call back. Other efficiency features are last number Redial, Speed dial, Call Divert to another extension or to an outside number and Boss/Secretary call intercept. You can call an extension directly via DISA (for analogue lines) or direct (for ISDN).

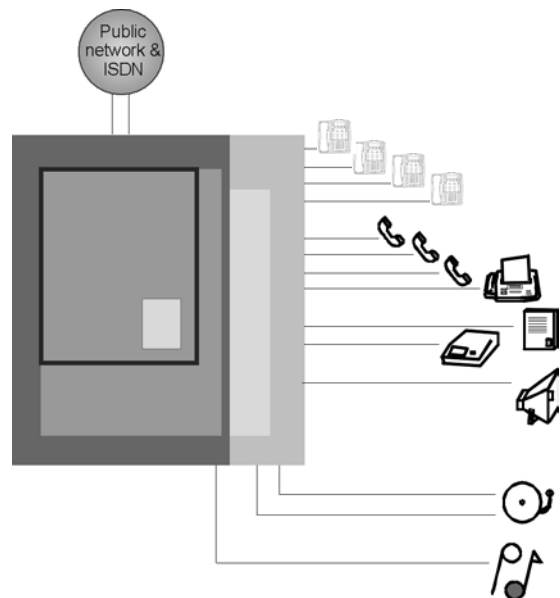

Security

Caller ID, Call Barring per extension, Extension Locking, plus there are two programmable Security Inputs.

Great Backup

Service & Guarantee:

All Globaltech systems are built to uncompromising standards and are sold throughout Australia and around the world. This success is due to the outstanding technical and service backup provided. Systems come with a 12 Month Globaltech Warranty.

Great Technology

State of the art technology:

- ✓ Handles ISDN digital & Analogue phone lines
- ✓ Fax Switching
- ✓ Auto attendant or Auto-Receptionist
- ✓ Direct extension dial-in
- ✓ Remote programming
- ✓ Detailed call log and record

Other Add-On Features:

- ✓ Door phones (up to two per system)
- ✓ Cordless Phones
- ✓ Music-on-hold
- ✓ Power Back-up
- ✓ Home Automation Output
- ✓ Voicemail

Compatibility:

- ✓ Most ordinary single-line phones
- ✓ Most Cordless Phones
- ✓ Own System Executive Phone
- ✓ Headsets, Speaker phones and Caller ID as per selected phones

Capacity:

- ✓ Up to 6 phone lines & 12 extensions
- ✓ Up to 4 ISDN (digital) lines
- ✓ Up to 99 central speed dials & additional 10 per extension
